Architectural Detail

ft17-cjc-detail.jpg

Because of the brightness of the image, you're losing the nice warm colors of the wood. Needs straightening - lines of the booth and wall are noticeably curved and distracting. Image could benefit from some sharpening. The big black borders on the sides are a nice touch but run the risk of being distracting.

Salinas High School

ft17-cjc-hs.jpg

Nicely composed with lines of the arch and building well straightened. Consider opening the shadows more. The big black borders on the sides are a nice touch but run the risk of being distracting. Image could benefit from some sharpening.

Agriculture

ft17-cjc-ag.jpg

Nicely composed. What do you want to emphasize here - the rows or the mountainside? Lighting is flat and some post-processing work could be used to make this image more impactful. Notice the blurred piece/strip at bottom right - consider cropping that out. Image could benefit from some sharpening.

Old and New

ft17-cjc-oldnew.jpg

Nice seeing of the satellite dish and the old building and doorway. Image may benefit from sharpening and working more with contrast and brightness. Black borders on sides are now distracting.

People

ft17-cjc-people.jpg

Nice framing of the man between the pole and tree and the flower pot above his head. Like the implied MAN letters at top of image frame. Consider working on the man to bring him out more

- because of the evenness of the tonality across the frame and his left arm overlapping the woman behind him, he's partly getting lost in the image. White hat on guy on left is distracting, try toning it down. Image could benefit from some sharpening.

Railroad Station

ft17-cjc-rr.jpg

Nice angle and composition. Losing the warmth of the colors because of brightness levels - try toning it down a bit and work on contrast. Image could benefit from some sharpening.

Street Art and Furniture

ft17-cjc-street.jpg

This wall mural could benefit from work on the brightness and contrast - losing some nice detail as a result. Image could benefit from some sharpening.

Photographers Choice

ft17-cjc-choice.jpg

Nice composition and leading lines of the trees. Really get the wet feeling of the day from this image. Consider toning down the bottom right corner and tree - distracts from the overall image. Image could benefit from some sharpening.
